Robert Alan Jamieson continues the discussion, begun in NNow # 8, of dilemmas about translation for writers who choose to write in minority languages.

The State of Scots

Matthew Cambeall, in his essay ‘To Bed with an Elephant’, addresses issues around translation as they affect Gaelic poets and which resonate with us writers of Scots. The key difference, perhaps, is that in the case of Scots it is less easy to see where Elephant ends and bedfellows begin. Scots and English shade into one another – part of a complex spectrum of language which rounds the North Sea. Whereas cousins across the water, just as indistinct from neighbours, achieved ‘language’ status centuries ago, Scots struggled to reach such a state of grace. Its current situation is both parlous and hopeful – parlous, there is increased understanding both at home and abroad that it too has justifiable claim to ‘language’ status – as recognised, finally, by the resumed Scottish parliament.

The academic work of the last century is vital and impressive – the Scottich National Dictionary, produced between 1931 and 1976 under the editorship of firstly William Grant and latterly David Murison, set out to represent the full spectrum of Scottish English dialects – particularly have much in common with the southern forms of Scots, reminding us that the old kingdom of Northumbria reached from Forth to Humber, that it was to the south of Humber the land of the Angles began, and that traffic and trade across the border is both ancient and everyday. A quick look at the work of Bill Griffiths, for instance, will confirm this sense that the forms of West Germanic languages used in the east coast of Britain do not neatly fit the current political map. There are many specific examples I could quote, but a favourite one of mine is the word ‘haar’. In my adopted home of Edinburgh, people take a certain pride in naming the North Sea fog thus, as if it was specifically an Edinburgh (or Leith) phenomenon. But it is a word used as far north as Shetland and, according to the OED, as far south as the Humber. Another example comes from a small pamphlet of Yorkshire dialect writing I picked up years ago. I was amazed at the title – ‘Cum thee Wic’ – which I recognised immediately as ‘Kum de wii’ (‘come this way’) from the tongue of Shetland. The content too seemed very familiar.

So it is a complicated picture. Even the name ‘Scots’ is potentially misleading, for as we know the Scots themselves were originally Celtic and not Germanic, and the term firstly referred to Scottish Gaelic. While one of the distinguishing factors between Scots and the other West Germanic tongues is the many Gaelic loan words and phrases, it is relatively easy for the language we now call Scots to blend into English – too easy, some might say. The danger of ‘false friends’, or ‘negative transference’ is great, where the same root word has evolved different meanings over time. Compared with Gaelic, it is not so easy to distinguish Scots, to maintain a ‘forked tongue’ as W.N. Herbert calls it. In the work of writers such as Kathleen Jamie or Don Paterson, we find a quieter voice inhabiting their predominantly English language work, rather in the manner that the voice of Orkney inhabits the work of George Mackay Brown – the occasional word amongst an otherwise English text, perhaps the odd idiom translated to give the feel of Scots. As a result, the need to translate into English is less pressing – in many cases a small glossary is quite sufficient.

But in my own case, or that of my native tongue, the picture is different. I come from the most northern part of the Scots world, and grew up speaking a very distinctive form with considerable North German (Scandinavian) elements, even 500 hundred years after the transfer of political power from Copenhagen to Edinburgh. Shetland’s long history of North Sea trade with speakers of Dutch, Frisian, and Low Saxon is also a factor. Distinctiveness for the Shetlander is not an issue. The problem is more what to do with those parts of the local tongue that do not fit neatly into the English or the Scots alphabet, particularly the ‘Scandinavian vowels’ as they were once termed by the education authorities – but these issues I have written about elsewhere, and lie beyond the remit of this essay. I should mention, however, the vital work of the late John J. Graham in the 20th century, the key figure in giving the Shetland tongue the same authoritative credibility described earlier in relation to Scots as a whole.

Translation: visibility and enrichment

Visibility is a difficulty for any writer, if they are at all bothered about their work being read. In situations where the medium is a smaller tongue isolated by a larger, where the media is largely conducted in a ‘foreign’ language, this difficulty is obviously magnified. I recall an interview with the Faroese poet Rúi Patursen, winner of the Nordic Council’s prize for literature in 1986, where he bemoaned the fact that Faroese writers had a maximum of some 48,000 readers. At the time I thought this substantial, but of course not all the people of Faroe read poetry. And the point is linguistic isolation, not poetic. The ‘minority’ writer is invisible to a world which does not know how to decode and so cannot recognise the merits of the work. A true poet may well make poetry whether anyone reads it or not, but we are entitled to ask, after Derrida, whether it is fully writing if no one reads it. And so, for the writer working in a so-called minority language, translation takes on a much greater importance. The irony is, perhaps, that the very Elephant that threatens to squash its smaller bedfellows, can also be the beast that helps transport. For the Elephant has a back so broad it can be a ‘bridge’ language that carries little us to distant others – others like ourselves, marginal and isolated from an Elephantine viewpoint. And to use the English as a beast of burden is perhaps a kind of revenge for being long-squashed; a tool to increased interaction and propagation of minority language via translation. Thus, I suggest, is payback for centuries of cultural imperialism – the revenge of the bedfellow. But here I must add that this Elephant has been, to me, a marvellous carrier, has carried me as reader from steppe to dashboard, from old world to new; from saga to haiku. While I do not wish to be swallowed by it, I am grateful to it.

My own first experience of translation was into English. It grew out of a friendship made at the Scottish Universities International Summer School in 1989, in ‘Soviet times’. Volodymyr Dibrova had something he wanted to show people ‘in the west’ – that Ukrainian literature existed – and I fell into line, working the literals he provided into the target language – English – for Edinburgh Review. One thing he explained to me was the iconic place of the letter ‘ў’ in Ukrainian, for it was this symbol that most distinctively marked Ukrainian from Russian – which reminded me of the non-English graphs in my Shetlandic work. And I consider this approach apposite for Scots generally, as one feature of Scots which distinguishes it from the southern Elephant is that whereas English lost the sound once represented by the graph ‘ь’ centuries ago – a short ‘ă’ – Scots did not; so that MacDiarmid’s famous line, for instance, might be represented as: “I’ll he rae haufway hoose.”

Following this work with Volodymyr Dibrova, I was approached to work with Nadia Kjurik on a Ukrainian feature for Northwords Now, focusing on Yevgen Pashkovski. I later worked on a similar ship made at the Scottish Universities International Summer School in 1989, focusing on Yevgen Pashkovski. I later worked on a similar project, focusing on Yevgen Pashkovski. I later worked on a similar project, focusing on Yevgen Pashkovski.
Translation is kindred to creation, but dif-

erent in that it begins with reading whereas

creation ends with it. Translation responds to

the original by freeing it as a mutable thing,

a complex of encoded ideas and associations

not merely to be admired, but transmuted,

not merely to be admired, but transmuted,

not merely to be admired, but transmuted,

not merely to be admired, but transmuted,
